Art Unit: 2815

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites "a carbon region" and "a metal thin film electrode". Claim 6 is confusing because it states that the carbon region is distributed within the metal thin film electrode. The two claims do not appear to follow especially because there is supposed to be a vacuum space directly over the carbon region. Claim 35 is likewise rejected.

Claims 1-5,7-16,30-34,36-50 are allowable over the art of record.

Huang '281 is relevant art.
